DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to an apparatus, classified in class 428, subclass 304.4.
 - II. Claims 9-12, drawn to a method of making the medical implant, classified in class427, subclass 2.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method as claimed can be used to make other and materially different product such as forming hydrogel coatings as adhesives and sealants on the surfaces of tissues.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Gerald Roberts on 9/15/2004 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-12 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Application/Control Number: 10/693,391

Art Unit: 1775

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Chudzik et al.(US 6,410,044).

With respect to claims 1-3, Chudzik discloses a medical implant article or device comprising a medial implant having a porous surface (col. 3, lines 25-40) with a macromer system coated on the porous outer surface of the implant article (col. 4, lines 30-45). The macromer matrix consists essentially of hydrogel (col. 5, lines 64-67, col. 6, lines 1-67 and col. 8, lines 30-45), which is hydrolysable under in vivo conditions (col. 7, lines 45-60). Since the macromer coating includes the same hydrogel as claimed, the same macromer would also have the same function such as lubricious when wet and in vivo absorbable as recited in claim 1.

With respect to claims 4-5, Chudzik discloses the macromer system coating may occupy a space of between about 0.1mm to about 10mm thickness (col. 4, lines 45-60).

Art Unit: 1775

With respect to claim 6, Chudzik discloses the macromer system can be used to fill voids within or upon the surface of the implant device (col. 5, lines 1-28).

With respect to claim 7, Chudzik discloses the macromer system can be applied with a bioactive agent (col. 4, lines 25-33).

With respect to claim 8, Chudzik discloses that the porous surface of the implant includes sintered titanium particles (col. 5, lines 35-45).

Accordingly, Chudzik meets all the limitations of claims 1-8.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ling X. Xu whose telephone number is 571-272-1546. The examiner can normally be reached on 8:00 - 4:30 Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah D. Jones can be reached on 571-272-1535. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
